Projects

Hackstarter

[live](#) | [github](#)

Platform for start-up companies to help raise funding in return for company equity. Backbone app consuming a RESTful Rails API. Single page app with bootstrapped data for quick user interaction.

Exigo

[live](#) | [github](#)

Clone of [Trello](#), Exigo is a collaboration tool used to organize projects into boards, lists, and cards. Heavy use of Backbone composite views and event handling with a RESTful Rails API.

Asteroids.js

[live](#) | [github](#)

A classic arcade game built using HTML5 canvas and JavaScript. Trigonometric functions calculate object velocities.

Skills

Ruby, Rails, JavaScript, jQuery, Backbone.js, SQL, Git, HTML, CSS

Experience

Marmol Radziner & Associates

Aug 2013 – Feb 2014

Systems Administrator & Web Developer

Provided front-end support to the marketing department to help maintain and improve the company's primary and e-commerce properties. Support end-users with technical issues such as software, hardware, and networking.

Daily Bruin

Jan 2013 – May 2013

Marketing Intern

Worked with a team of four using a CMS to develop *SafeSex101*, an iOS application that encourages promotion of safe sex in the UCLA community. Produced content and developed marketing campaigns that increased user download by 200%.

Education

University of California, Los Angeles

2011-2013

BA, Anthropology, concentration in biology

Relevant courses: Introduction to Computer Science, Introduction to Programming for Internet
